

# PAROLES ALBUM *10 FEET FORWARD*

All written by Leo SEEGER

## TEN FEET FORWARD

Ten feet forward's all I need  
Ten feet forward's all I need  
Ten feet forward's all I need  
But it can't take long  
To set the pace and kiss her lips

One step backwards and she's gone  
One step backwards and she's gone  
One step backwards and she's gone  
And I stay alone  
With a simple taste of fog

Ten years after's just the same  
Ten years after's just the same  
Ten years after's just the same  
Only remains  
I just have to reboot the game

Missing trains and boats  
With just a step aside  
The craziest moments  
Of a simple empty life

Getting high on a living simulator  
Leaving for nowhere and with no time on your side  
Trying to make a way with no real horse to ride  
Trying to make sense with no real words to rhyme

Four more lines is all I need  
Four more lines is all I need  
Four more lines is all I need  
But it won't be long  
To find the way to end this song

## ANYTIME

Anytime you walk on a concrete path  
It's a thing you can't forget  
Anyday you wake up with a muddled mind  
And wonder what you'll get

Sailing paperboats, down the river  
With written words of hate

Anytime you choose the biggest bun in the window  
And you don't feel any shame  
Anytime you talk with a Colt 45  
To mark the words you say  
Attending funerals with a bowtie  
And a bottle of champagne  
Anytime you keep the genie in the bottle  
And shake him till he's dead

Lonely and sad anytime at all  
Throwing ideals in the pond, everything sounds like a lost cause

Anytime you lied, anytime you twisted  
The truth to all your friends  
Anytime you tried to leave a mark on earth  
And realized it is only your grave

Dying crushed down by a vicious mirror,

Narcissus's worst death  
That time is the last time and you can't look back  
It's the day when it finally ends

## **BIG BIRDS ARE DANGEROUS**

Well I can be a heron for one day  
Flying above the river, letting my thoughts pass away  
Big fish and little fish they all can be my prey  
Under the sunny sky on a September day

Everytime I feel so secure  
My backside feathers shine and I don't feel fear anymore  
I'm just the one who passes above your head  
I'm going everywhere, you'll never bring me back instead

Well I can be a heron for a time  
Hiding in weeping willows by the country riverside  
Don't need to hurry for the early morning train  
As cool as Nick Cave as he pushes the sky away

Everytime I feel so secure  
My backside feathers shine and I don't feel fear anymore  
I'm just the one who passes above your head  
I'm going everywhere, you'll never bring me back instead

Well I am in the river  
Well I am in the sky  
A super heron passing by

Well I can be a heron for one day  
Big birds are dangerous

## **NOWHERE**

Your feet won't lead you nowhere  
As far as I can see  
Why don't you let them free ?

There's something special you bear  
A thing that never lived  
Why would you set it free ?

There's so many dark rooms in your mind  
That every thought is stored behind  
The naughtiest ones with the colorful blended in slime

There's something dark over there  
A thing that never breathed  
Why would you set it free ?

There's so many dark rooms in your mind  
That every thought is stored behind  
The naughtiest ones with the colorful blended in slime

Enjoy the view on what you think, love  
Turn it blue and let it pay off  
You'd never be in debt anytime  
Sometimes you feel that darkness  
A headsman in the row  
Cutting heads off like daisies  
Watching them fall and roll

There's so many dark rooms in your mind  
That every thought is stored behind  
The naughtiest ones with the colorful blended in slime

Enjoy the view on what you think love  
Turn it blue and let it pay off  
You'd never be in doubt nor in debt anytime

## DOWN ON OUR KNEES

Stone age dancing on the 13th floor  
Dishes flying through the kitchen door  
Last time we died, there was blood on the floor

Spoiling carpets with a glass of wine  
It's an obscure cloud for a romance to shine  
Let you be you and I'll surely be mine

There's no more stones to pave the end of our road  
The stifling weight of a painful load  
The flaw in the plan, the crap of it all

Let us go  
Changing the seasons in that daily show  
No promises but just the will to know  
And figure out that  
We can't live down on our knees

Deserted orphans of a real life  
Joined compliant solitary hearts  
It takes the whole to catch it all

There's no more stones to pave the end of our road  
The stifling weight of a painful load  
The flaw in the plan, the crap of it all

Let us go  
Changing the seasons in that daily show  
No promises but just the will to know  
And figure out that  
We can't live down on our knees

No we won't live down on our knees (x3)

## FLAVOUR OF THE WEEK

Sometimes it seems you're the flavour of the week,  
The one who's loved  
You gotta take your time  
And realise what's in your mind

It's already gone  
So don't let your troubles aside†

It's something special about your mind  
A change of mood in a glimpse of time  
Now you want to put the whole thing behind  
But how do you deal with this double bind†?

I wonder if you ought Ö.ought to blow your horn  
Changing donkeys into unicorns

It's only something about your mind  
A change of mood in a glimpse of time  
Now you want to put the whole thing behind  
But how do you deal with this double bind†?

Take you time...to realise....  
Take your time  
To realise what's in your mind

No need to be famous  
Just be fine

## STILL BORN

Found dead  
Soon enough  
Found dead  
Dead & Gone  
Nobody will be missed  
He was a stifled spark in a stillborn fire

Gone dead  
Fast forgotten  
In the blinking of an eye  
Vanished in the dark of an endless night

Nobody knew who he was, what he did, where he came from  
Just a first stone put to the ground and he was alone

Found dead  
Dead & Gone  
Nobody will be missed  
He was a stifled spark in a stillborn fire  
Nobody knew who he was, what he did, where he came from  
Just a first stone put to the ground and he was alone

Don't give a fuck about posterity  
Digging up the shadow of a passed out  
Greying heart

Stone dead  
Soon enough  
Nobody will be missed  
He was a stifled spark in a stillborn fire

Nobody knew who he was, what he did, where he came from  
Just a first stone put to the ground and he was alone  
AH.....  
Just a few words thrown in the air and he was alone  
Just a few words thrown in the air and he was alone

## STAGE FRIGHT

Though I pretend that I'm fine  
Sipping this glass of red wine  
Now I feel all but a king when the lights come  
On the stage

Though it ain't rock attitude  
They say that boys must be rude  
But it ain't easy you know to enter the show  
Folky mood

You may say it's nothing  
Just take a deep breath and it's fine  
So I think it's nothing  
I take a deep breath , here I am  
But I really walk the line

Though what I sing can be strange  
Pictures are within my range  
Out of my mind there's a dream  
To be laid anyday on a page

You may say it's nothing  
Just take a deep breath and it's fine  
I must tame the words and the sounds  
That can be hard to find  
But I really walk the line

You may say it's nothing  
Just take a deep breath and it's fine  
But you can't hold my hand on the stage  
When the lights turn down

## CONSIDER

Did you ever consider suicide ?  
As a true idea or just a trick of pride ?  
All you say about all you feel  
Can't you feel relieved ?

Did you ever think about leaving the room  
In a burst of anger or with a mask of gloom ?  
All you've shown is only a part of the scene  
But can't you feel relief if things are getting clearer  
Now the moon shines in your dreams ?

Desperate wrestler on an empty ring  
The end of the story of a mighty king  
Everything now amounts to nothing  
But don't beat yourself up  
You're miles away from what you really were

Did you ever consider what they said  
Did you ever listen to the ebbing waves  
These lines you have crossed many times  
Sleepwalking on a burning wire

You've gone too far now you can get no higher  
You've gone too far now you can get no higher  
You've gone too far now you can get no higher  
You've gone too far now you can get no higher

## ROSETTA STONE

Union, where have you been ?  
Cos we were led on twisted roads  
You said you'd never leave us  
And said the walls were gonna fall  
Why did you leave us alone ?  
We can't understand anyone  
We're looking for a new Rosetta stone

Leading lambs to the slaughter  
Stuck in a bashing machine  
Delivering all but pleasure  
They made us work to agony  
Why did you leave us alone ?  
We can't understand anyone  
We're looking for a new Rosetta stone

Rising up in the mainstream  
Counting backwards what we'll get ?  
Growing the riot seed  
A promise of a new day  
Rising up in the mainstream  
Counting backwards what we'll get ?  
Growing the riot seed  
The promise of a new day

Why did you leave us alone ?  
We can't understand anyone  
We're looking for a new Rosetta stone

## **WRITTING HISTORY**

Pay no mind to all the prophets  
Writing history on our wall  
Painting days in darkened colors  
Changing summer to fall  
Leading us down twisted roads  
No one would recall, it's a rip off call

Selling news like daily dope  
And breaking eyes through the brain  
All time tensions, grown up fears  
Everything is insane  
Breeding nightmares in a factory  
Industrial made-up souls

If only we'd find the time  
To put an end to the crimes  
To cast away all the distorted words  
That we endlessly hear when we turn that old radio on

Making each day a fool of us  
Selling ready made thoughts  
What is different looks like danger  
What is new seems false  
Leading us on twisted roads  
No one would recall, it's a rip-off call

## **DISMISSED PROMISE KEEPER**

When the strings are cut off  
We only fall  
It's just a matter of time  
But things just seemed pretty good for a while

Old rusty bridge above the river  
Nevermind the flow  
But it surely ends the grating at a time  
There's nothing to do to break the line

Love's a dismissed promise keeper  
It gives you hopes and takes them all away  
He once thought that he even could stay  
But there's no place for surrogate lovers

Ideals drowned deep in the muddy flood  
When the stakes are this high  
He's just a bitter little man  
With thoughts that seemed pretty good for a while

Debasing all kind of feeling  
In a movement of recoil  
A stubborn iron man  
But sometimes you're to let sleeping dogs lie

Love's a dismissed promise keeper  
It brings you dreams and takes them all away  
He once thought that he even could stay  
But there's no place for surrogate lovers
